

Technical Specifications:

Wall stand height:

86.75in (220.4cm)

Receptor height:

23.38in (59.4)

Vertical travel range:

58.38in (148.28cm)

Wall stand width (with receptor):

23.25in (59cm)

Wall stand depth (with receptor):

13in (33cm)

Maximum focal spot height:

72.38in (183.84cm)

Minimum focal spot height:

14in (35.6cm)

Front panel aluminum equivalency:

0.4mm

Weight:

258lb (117kg)

Power requirements:

24VDC

3307 Tube Stand

Min. vertical travel:

14.5in (37cm)

Rails:

6ft longitudinal floor and ceiling rail set allows for 40in (100cm) and 72in (180cm) film distances

Maximum ceiling height:

114in (274cm)

Minimum ceiling height:

94in (233cm)

Tube rotation:

180° tube rotation about the horizontal axis

System Options

- Choice of high frequency or single phase generators to meet specific needs
- 10:1 or 12:1 ratio grids for analog or digital imaging
- 17in x 17in (43cm x 43cm) grid cabinet or bucky
- Ion chamber (AEC)
